

SUMMARY

We are looking for a React Native developer interested in building performance mobile apps on both the iOS and Android platforms. You will be responsible for architecting, designing and building these applications, as well as coordinating with the teams responsible for other layers of the product infrastructure. Building a product is a highly collaborative effort, and as such, a strong team player with a commitment to perfection is required

We are looking for self-motivated, energetic candidates who are looking for next set of challenge in their career. Mobile app developer you will be responsible for developing and maintaining the Mobile app.

NOT a classic Website Development job involving simple development and maintenance of websites. We work on complex web applications that are technologically challenging. The projects are done in small teams, which result in greater responsibility for each member of the team.

We genuinely want you to learn and grow and will provide you sample opportunities for that.

Responsibilities

- Deliver innovative solutions to drive next generation user experiences, designs and technologies
- In depth knowledge and proven record in developing mobile apps
- Extensive experience with React and state management frameworks such as **Redux/MobX**.
- Experience with **React Native**
- Technical knowledge of **RDBMS**
- Development experience with **iOS/Android or both**
- Strong knowledge of **data structures, algorithms** and run time optimization
- Ability to write well-documented, clean Javascript code
- Build pixel-perfect, buttery smooth UIs across both mobile platforms.
- Leverage native APIs for deep integrations with both platforms
- Diagnose and fix bugs and performance bottlenecks for performance that feels native
- Maintain code and write automated tests to ensure the product is of the highest quality
- Rock solid at working with third-party dependencies and debugging dependency conflicts

Required Skills

- Firm grasp of the JavaScript {{and Typescript or Closure Script}} language and its nuances, including ES6+ syntax

- Knowledge of {{functional or object-oriented}} programming
- Familiarity with native build tools, like XCode, Gradle {{Android Studio, IntelliJ}}
- Understanding of REST APIs, the document request model, and offline storage
- Experience with automated testing suites, like {{Jest or Mocha}}
- React Native
- Redux/Mobx
- RDBMS,
- Third Part SDK integration
- Development experience with **IOS/Android or both**

React native Android app developer	React Native IOS App developer
• JAVA	• SWIFT 4.0/4.2
• Android studio 3.2 tool	• XCODE
• Minimum Version Lollipop	• Minimum version IOSIO
• XML	• XAML
• Material Design pattern	• MVC
• Web services &API	• Web services & API
• JSON/GSON	• JSON
• SQLite Database /realm database	• SQLite Database/core data

Industry: IT / E – Learning and Assessment

Functional Area: IT Software - Application Programming, Maintenance

Role Category: Programming & Design

Role: React Developer

Employment Type: Permanent Job, Full Time **Qualification:** B.E./B.Tech./MCA
